

# QPR Metrics

## Meet Your Targets

### Take the next step to automate your performance and strategy execution

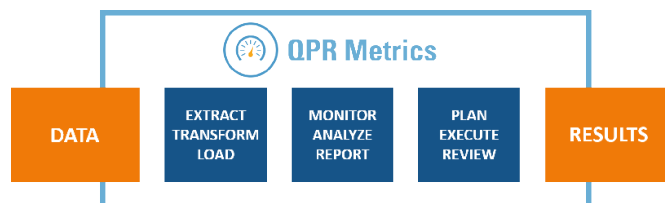

QPR Metrics combines robust and flexible performance management functionality with a beautiful user experience. Stunning dashboards and scorecards with KPIs are also available in your pocket through QPR MobileDashboard. QPR is your perfect solution for automating your performance management needs. QPR also uniquely combines performance and quality management enabling operational improvement.

QPR Metrics is a business user optimized tool, which helps your management to consolidate and report data as well as manage your strategy and operations through powerful collaboration features. QPR Metrics can be managed with an intuitive client and effectively used through a web-based portal. For touch screen device users QPR MobileDashboard provides the perfect experience for accessing and modifying dashboards on the go.

With support for multiple management standards, methodologies and initiatives, QPR Metrics will become your number one platform in various performance management initiatives. QPR Metrics collects data automatically from any of your business systems and consolidates it into dashboards, scorecards, strategy maps or other customized view.

## Collaboration and reporting

With QPR Metrics you can browse and analyze performance models, apply a multitude of filters for analysis and share findings. The tool offers a rich choice of graph templates such as bar and pie charts, Gantt charts, radar charts, risk heat maps and many more. For reporting QPR Metrics offers automatically updated web booklets and reporting to Word, Excel, and PowerPoint or directly publish as a PDF.

Managing your objectives can be done with customizable web-based portal actions, allowing employees to take a more active role by adding comments, ideas or incident reports.

## Integrate all data sources

QPR Metrics is a robust platform with a powerful calculation engine that can be used for any kind of performance monitoring. Together with the QPR IntegrationPlatform, you can access your process performance indicators from any data source e.g. SAP. QPR's patented technology consolidates end-to-end data from several source systems. Process flowcharts in QPR ProcessDesigner can access measure information from QPR Metrics.

## Fast to implement and manage

Rich template support combined with easy to define and reusable KPI attributes allow organizations to roll out and go live within weeks. QPR Metrics provides effective scorecard management functionality requiring minimum effort when changed. Creating new metrics and cascading them to complement a multitude of existing scorecards is easy and can be done within minutes.

Individual users and groups can be provided with different levels of access. QPR Metrics also integrates with local user management systems for centralized user management and to facilitate single sign-on.

## Key highlights

- Advanced functionality to satisfy all your performance management needs
- Easy to use web portal for viewing and collaboration
- Easy and effective data input – integration and manual input via web
- Multiple options to automate performance reporting
- Support for all relevant frameworks
- Scalable to any organization
- Fast to implement, easy to use and manage – zero coding
