

QPR EnterpriseArchitect Model all dimensions and layers of Enterprise Architecture!

QPR EnterpriseArchitect offers all stakeholders a single design and collaboration environment where all enterprise architecture dimensions can be modeled, analyzed and communicated effectively. Boost your organization by establishing the capability for company wide transformation or for the support of single development projects. With QPR EnterpriseArchitect all dimensions can be linked and thus help users obtain a holistic view of the architecture, identify the full effect of changes, and evaluate business impact. QPR ensures your operational development initiative will benefit from the active participation of all stakeholders, from business users to IT specialists

With QPR EnterpriseArchitect You Can:

- ▶ Manage all EA layers and dimensions in one tool
- ▶ Tailor the EA method to your needs
- ▶ Analyze assets, relationships and dependencies
- ▶ Perform effective gap analysis
- ▶ Use dashboards for performance monitoring
- ▶ Integrate external information
- ▶ Publish and share your artifacts instantly online
- ▶ Supports simultaneous use of multiple languages both with the tool and content
- ▶ Available in almost 20 languages!

Model all dimensions and layers of Enterprise Architecture!

All organizations have operations. Smart organizations improve their operations - the smartest ones do it with QPR EnterpriseArchitect.

QPR enables you to achieve a sustainable capability for analyzing, planning and improving your business and operations. QPR EnterpriseArchitect helps building models which ensure

that operations are in line with strategy. It also helps you to identify capabilities to respond faster to changes in operational and competitive environments, as well as supports your capability development and program portfolio management.

QPR EnterpriseArchitect is part of QPR Suite, a set of operational development tools widely adopted both in private

and public sector organizations. Through the QPR Suite users can manage, measure and monitor with dashboards and reporting tools to ensure a seamless way of working with enterprise architecture. QPR EnterpriseArchitect with its clear visualization and communication via a web-based portal makes strategy more understandable and capabilities more tangible for your organization.

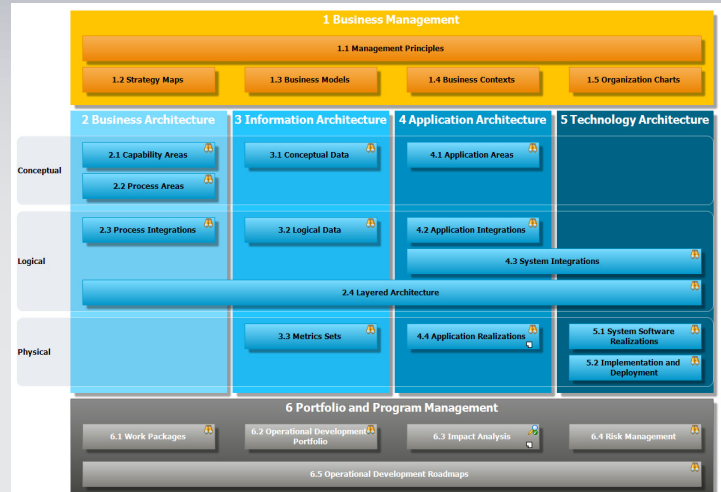

“QPR EnterpriseArchitect allows us to model not just how things are, but also what has been envisioned, where we are going and where we want to go. This way we can determine how changing one system affects other systems.”

Patrik Maltusch, Head of Enterprise Architecture, Aalto University

With QPR EnterpriseArchitect your team obtains an all-inclusive, multi-user environment for creating and managing the artifacts needed to design all enterprise architecture dimensions and perform gap analysis. QPR EnterpriseArchitect interlinks architecture dimensions with each other, which enables users to conveniently identify how changes have effects in other dimensions. It will also help organizations to accurately assess the business-criticality of proposed IT investments.

A completely open metamodel permits QPR EnterpriseArchitect users a flexible approach to enterprise architecture modeling while also supporting with unmatched usability any of the available frameworks and standards like TOGAF®, ArchiMate®, Zachman and BPMN. QPR EnterpriseArchitect is also complemented with an integrated methodology for enterprise architecture based operational development (QPR ODM), and the tool features have been optimized to support the methodology.

QPR EnterpriseArchitect offers powerful process modeling features to help gain active participation from all stakeholders. The tool with its flexible way of working enables discovering the best options for operational development by working independently on the different dimensions and combine these later. Collaboration is supported by a web portal for commenting, sharing ideas, assigning tasks and monitoring progress. Users are also offered many reporting and publishing formats such as Microsoft Office Word, Excel, PowerPoint, PDF and Dynamic HTML.

QPR EAXpress

QPR EAXpress allows you to get the benefits of QPR EnterpriseArchitect as a standalone version. QPR EAXpress is optimized for the work of mobile professionals such as consultants, analysts, architects and process owners. A powerful single user solution enables a fast start in managing all enterprise architecture layers and dimensions as well as performing gap analysis. You can also create, maintain and navigate enterprise architecture artifacts drastically faster than when using business graphics tools.
